

Braumeister

200 l

Int.
Edition

Brew 200l of beer!

Quickly, simply and professionally
with the lowest amount
of acquisition cost!

Valid from 1. August 09

Brew your own, individual beer with the Brewing Master and make your dream come true!

In doing this, make use of the well-proven concept of the Brewing Master, which is a compact brewing facility. Brewing, purifying, hop boiling, whirl pooling and cooling down – everything is accomplished in one single kettle.

The fully automatic brewing control ensures the brewing process of any individually adjusted recipes and runs through all brewing phases according to precise time and temperature parameters. The purifying process is realized easily and quickly just by lifting up the malt pipe with the lifting device mounted on it. Thus, you will be able to achieve a proper and quick purifying process.

Last but not least, the facility is mobile and therefore easy to move, with limited space requirement. It is the optimal equipment for restaurants, pubs, specific events or brewing communities. Make yourself independent and brew your own individual and very special beer for yourself or for your guests. Owing to the low investment costs and the favourable litre price, the equipment will have paid off very quickly.

The Braumeister at a glance:

„Braumeister“ during the brewing process

„Braumeister“ during the purifying process

„Brewing makes fun“

Compact and mobile facility

Well thought-out function

Accessory: fermentation barrel 240 l
